

March 6, 1980

LB 789

Now that \$8 million, I don't know what the homestead exemption but I understand it is going to cost around \$6 million and that leaves \$2 million left. That means we will go into the general fund for \$2 million additional money. Just so we know what we are doing. I think Senator Warner gave us a very good explanation of it and Senator Cal Carsten and you and I and the Star are in agreement on one or two things I hear but I can tell you this that if we keep on appropriating money, I don't want anybody to say they are going to stay within the seven percent. I don't want you to say that. I don't want you to believe that because we are not going to be able to do so if with just these two bills, these two, the homestead exemption and the aid to the welfare, we are going to go up \$2 million over the money we have got in the kitty.

SENATOR CLARK: The Chair recognizes Senator Nichol.

SENATOR NICHOL: Mr. Chairman, members of the Legislature, I would like to ask Senator Goodrich a question with Senator Warner listening in. Senator Goodrich, you have been on Appropriations, right?

SENATOR GOODRICH: Yes.

SENATOR NICHOL: And ordinarily don't these kind of bills go through Appropriations?

SENATOR GOODRICH: No.

SENATOR NICHOL: Why not?

SENATOR GOODRICH: Because they usually go all through as a regular bill. See the statutory limit that is set in our...in other words, we put in our statutes a limit that says that aid to dependent children shall be no more than these dollars. So, consequently, we have to change the statutes themselves. Now the budget bill appropriates dollars. Now that will come and the Appropriations Committee, for example, can include this in their appropriation if they wanted to. However, they don't even usually do that because they say that if you have to change the statutes, then have a separate bill for a substantive change of statute. Number two, if you have a bill like that, fund it with an A bill so we separately categorize that money and we can spell it out exactly how much that specific bill costs. So that is why we don't usually bury it in the budget bill. We spell it out so everybody can see what it is.
